

A scatter plot showing the relationship between the Y residual [mm] (X-axis) and the kinematic prediction (Y-axis). The X-axis ranges from -10 to 0, and the Y-axis ranges from -10 to 10. A legend indicates that red circles represent 'kinematic prediction'. The plot shows a cluster of blue data points around (-10, -10) and a single red data point at (0, 0).
